

Here's a full list of all annotation labels possible on an image, grouped by category where appropriate, along with their general meanings:

Damage Types

- **cracked** – *Replace with smashed.* Cracks typically occur only on **glass surfaces** (e.g., windscreens, windows).
 - **dented** – Depressions or inward curves caused by impact. Common on body panels like doors or bumpers.
 - **scratched** – Surface abrasions or shallow marks. Can occur anywhere on painted or plastic surfaces.
 - **torn** – Material is ripped apart. May apply to body parts (doors, bumpers etc)
 - **buckled** – *Replace with dented.* Warping is typically just a deeper dent.
 - **broken** – Applies to **non-glass parts** like **lights** or **plastic panels** that are fractured or snapped.
 - **raptured** – Torn or burst violently. Only applies to **tyres**.
 - **bent** – Twisted or out-of-shape components. Primarily applies to **metal parts** like **tyre rims**.
 - **bulged** – Outward bump, usually on the **sidewall of tyres**. Indicates structural weakness or internal failure.
 - **flat_tyre** – Tyre has lost air and is visibly deflated. Applies only to **tyres**.
 - **chipped** – *Replace with smashed.* Chipping occurs on **glass**, but full shattering is better labeled as **smashed**.
 - **smashed** – Complete or partial shattering. Should be used **only for glass surfaces** (windscreens, windows), **not lights**.
 - **missing_cover** – A part's outer protective **cover is absent**. E.g., missing mirror cap, light housing, etc.
 - **dislodged** – A part is **misaligned or separated** at a joint or seam (e.g., bumper-fender gap).
 - **rust_pad** – Area visibly **affected by rust**, usually orange/brown and flaky.
 - **wire_repairs_pad** – Region showing **visible wiring repairs**, often informal or temporary.
 - **filler_repairs_pad** – Section with **body filler** used to patch or reshape damaged panels (often color mismatched or uneven).
-

Vehicle Components

These labels refer to **vehicle body parts or accessories**, each corresponding to a specific area or function.

Front Area

- **front_grille** – The grille at the front of the car, usually between the headlights, allowing airflow to the radiator.
- **front_windscreens** – The large front-facing glass; also called the **windshield**.

- **front_wiper_blade** – The blades that sweep the windscreen to clear rain or dirt.
 - **front_wiper_nozzle** – Nozzles that spray washer fluid onto the windscreen.
 - **front_bumper** – The front lower panel that absorbs minor impacts.
 - **front_bumper_guard** – Protective trim or metal added to the bumper to prevent scratches or impacts.
 - **bonnet_guard** – A plastic or metal edge protector fitted at the front of the **bonnet** to deflect stones/debris.
 - **bonnet_lid** – The hinged engine cover (aka **hood**) at the front of the vehicle.
-

Rear Area

- **rear_bumper** – The back lower panel that absorbs impacts from behind.
 - **rear_bumper_guard** – A protective add-on strip/panel over the rear bumper.
 - **rear_windscreen** – The large rear-facing glass at the back of the car.
 - **rear_wiper_blade** – Wiper blade attached to the rear windscreen (mostly on SUVs and hatchbacks).
 - **rear_wiper_nozzle** – Sprays fluid onto the rear windscreen.
 - **lower_tailgate** – The bottom portion of the tailgate in vehicles with split-opening rear doors.
 - **tailgate_light** – Rear light fixtures mounted on or near the tailgate (can include stop lights or indicators).
-

Left Side (LHS)

*LHS = Left-hand side when facing **forward** from inside the vehicle (driver's left on left-hand drive cars).*

- **lhs_front_door** – The left front door.
- **lhs_rear_door** – The left rear door.
- **lhs_fog_light** – Fog light on the lower-left front bumper.
- **lhs_headlight** – The left front headlight.
- **lhs_headlight_guard** – A cover/protector for the headlight.
- **lhs_tail_light** – The left rear light cluster.
- **lhs_tail_light_guard** – Cover or cage protecting the left tail light.
- **lhs_side_mirror** – The side mirror on the left.
- **lhs_side_step** – A step bar beneath the left side doors (mostly on SUVs/trucks).

Additional LHS Components:

- **lh_front_door_moulding / lh_rear_door_moulding** – Decorative/protective trim along the doors.
- **lh_front_door_guard / lh_rear_door_guard** – Extra plastic/rubber guards to prevent dings.
- **lhf_door_glass** – Glass window in the **left-hand front** door.
- **lhf_door_handle** – Handle on the **left-hand front** door.
- **lhf_fixed_glass** – A non-movable piece of glass near the left front door (e.g., triangle glass).

- **lhf_top_fender** – The top part of the left front wheel arch/fender.
 - **lhf_tyre** – Left-hand front tyre.
 - **lhf_wheel_cap** – Cover or hubcap on the left front wheel.
 - **lhr_door_glass / lhr_door_handle / lhr_fixed_glass** – Components of the **left-hand rear door**.
 - **lhr_tyre / lhr_wheel_cap** – Rear left tyre and hubcap.
-

● Right Side (RHS)

*RHS = Right-hand side when facing **forward** from inside the vehicle.*

- **rhs_front_door / rhs_rear_door** – Right front and rear doors.
- **rhs_fog_light / rhs_headlight / rhs_tail_light** – Front/rear lights on the right side.
- **rhs_headlight_guard / rhs_tail_light_guard** – Protective covers or cages.
- **rhs_side_mirror / rhs_side_step** – Mirror and step on the right side.

Additional RHS Components:

- **rh_front_door_moulding / rh_rear_door_moulding** – Trim along right doors.
 - **rhf_door_handle / rhf_fixed_glass / rhf_top_fender / rhf_tyre / rhf_wheel_cap** – Parts of the **right-hand front** door/fender area.
 - **rhf_front_windbreaker / rh_front_windbreaker** – Wind-deflecting panels near the front right door/glass.
 - **rh_rear_windbreaker** – Rear version of wind-deflecting panel on the right.
 - **rh_door_glass / rh_door_handle / rhr_door_handle / rhr_door_glass** – Glass/handles for right doors.
 - **rhr_tyre / rhr_wheel_cap** – Right rear tyre and wheel cap.
-

● Other Body Parts

- **centre_pillar** – The vertical support between front and rear doors (also known as the **B-pillar**).
- **pillar_antenna** – An antenna mounted on the A/B/C-pillar (side edge of the car).
- **boot_lid** – The cover/lid over the rear storage compartment (**trunk**).
- **boot_spoiler** – An aerodynamic attachment on the boot lid.
- **roof_spoiler** – A spoiler mounted at the rear edge of the roof.
- **fuel_cap** – The cover over the fuel inlet.
- **spare_wheel** – The backup tyre (may be mounted under or at the rear).
- **bullbar** – A metal bar on the front of the vehicle, often for protection against animal collisions.
